

# ANNOUNCING 2015 ADVANCED RTU CAMPAIGN AWARDS

Receive national recognition and publicity for  
high-efficiency RTU efforts

*To apply, building owners and HVAC service providers complete the submission spreadsheet with information on your organization's RTU efficiency activities by March 1<sup>st</sup> 2015 and email to [info@advancedRTU.org](mailto:info@advancedRTU.org) (submission of award application doubles as form to join Campaign)*

*Winners will be announced at the DOE Better Buildings Summit in May 2015*

Questions or Comments? Email [info@advancedRTU.org](mailto:info@advancedRTU.org)  
Download the submission spreadsheet and learn more at <http://www.advancedRTU.org>

## Download the Awards Submission Spreadsheet

[Click here to download the application spreadsheet.](#) The simple application is an excel file with areas to input information over five tabs. (Note: Submission of award application doubles as form to join Campaign.) Submit the completed form via email to [info@advancedRTU.org](mailto:info@advancedRTU.org) by March 1st 2015.

## Questions? Watch this 8-minute Overview

Watch this [short 8 minute pre-recorded webinar](#) for a quick walk-through of the awards process and submission spreadsheet.

## Participant Awards Categories

1. Highest number of high-efficiency RTU installations by a government organization
2. Highest number of high-efficiency RTU installations by a commercial company
3. Highest number of advanced RTU control retrofits by a government organization
4. Highest number of advanced RTU controls retrofits by a commercial company
5. Highest number of RTU installations that meet/exceed RTU challenge specification
6. Largest efficiency gain for a single building RTU replacement project
7. Largest efficiency gain for a multiple building RTU replacement project
10. Most innovative RTU management approach by a Participant

## Supporter Awards Categories

8. Highest number of high-efficiency RTU installations by an ARC Supporter (contractor/service provider/non-manufacturer)
9. Highest number of advanced RTU control retrofits by an ARC Supporter (contractor/service provider/non-manufacturer)

## Do you have Progress to Share?

The Advanced RTU Campaign is always interested in learning about Participant and Supporter progress: new high-efficiency RTUs installed, existing RTUs retrofitted with advanced controllers, procurement language adjusted to meet Campaign efficiency thresholds, etc. If you share updated progress with the Campaign, we'll be happy to promote it via website shout-outs, case study creation, or other recognition methods.

## What's the Advanced RTU Campaign all about?

The Advanced RTU Campaign encourages commercial building owners and operators to replace older, inefficient RTUs with high-efficiency units or to retrofit RTUs with advanced controls to take advantage of the incredible energy and cost savings and improved thermal comfort. Campaign participants include market leaders such as adidas. The lead organizers of the Campaign include ASHRAE, the Retail Industry *Leaders Association (RILA)*, the *U.S. Department of Energy's Federal Energy Management Program (FEMP)* and Better Buildings Alliance. To learn more, visit the Campaign website at [www.advancedRTU.org](http://www.advancedRTU.org)
